## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

### ***Terminal Disclaimer***

2. The terminal disclaimer filed on 03/01/2010 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US7472612 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Drawings***

3. The drawings were received on 03/01/2010. These drawings are unacceptable.

Figure 1 has been labeled as Prior Art however; corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to this Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Oath/Declaration***

4. Applicant is now required to submit a substitute declaration or oath to correct the deficiencies set forth: Mr. Dennis Martell's signature is not provided in the Signature window. The substitute oath or declaration must be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability" (PTO-37). Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136. Failure to timely file the substitute declaration (or oath) will result in **ABANDONMENT** of the application. The transmittal letter accompanying the declaration (or oath) should indicate the date of the "Notice of Allowance" (PTOL-85) and the application number in the upper right hand corner.

**EXAMINER'S AMENDMENT**

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Solomon Zaromb on 03/01/2010.

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: Figure 1 is required to also be labeled with "Replacement Sheet" in the header of the document. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

***Response to Arguments***

6. Applicant's arguments, see Examiner's Amendment above and Remarks, filed 02/22/2010, with respect to Claims 1-20 have been fully considered and are persuasive. The rejection of 103 has been withdrawn.

***Allowable Subject Matter***

7. Claims 1-20 are allowed.

8. The following is an examiner's statement of reasons for allowance: Claims 1-20 are toward a device and methods of using the recited device, wherein among the combination of limitations for the device and method of using the device, the device must include an electrostatic precipitator to the wet electrostatic precipitation-based apparatus, wherein the electrostatic precipitator consists of: A). A gas-and liquid-containing chamber; B). Means for introducing an analyte-free collection liquid into said chamber; and C). Means for rapidly sampling a volume of ambient air and transferring said analyte therefrom into said collection liquid, said sampling means consisting of: an air intake means, an air venting means, and means for removing from said chamber an analyte-enriched collection liquid; wherein said volume of air passes through a horizontal air inlet and thence through a vertical electrically conductive collector electrode tube with means for applying and adjusting an electric field between said tube and a co-axial spiked wire- or rod-shaped discharge electrode, said collector tube and discharge electrode forming part of said chamber, wherein said electric field is high

Art Unit: 1797

enough to effectuate a corona discharge so as to generate ionized particles that could be driven towards said collector electrode by an electric field, and wherein said removing means comprises means for feeding said enriched liquid to an appropriate detector or storing said liquid for subsequent analysis.

9. The prior art of record does not suggest nor disclose the device or the methods.

10. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
